From complaint to cited draft.

The system reads the case, cites every fact it uses, drafts the contract, and stops. Nothing is written until a person approves that exact draft, and the approval is bound to its hash.

THE PATH

01
Read the bank
27 tool attempts per pass, including 3 retries.

02
Bytes to typed bodies
A bad body is retried, then a typed error, never an empty list.

03
Text to a contract
Six to nine citations, each an exact slice of a named source.

04
Hash and human gate
A human approves the hash; a changed draft is refused before any write.

PROVEN TODAY

12/12	1014	100.00%	3670.0	0
DEV CASES PASS	TESTS PASS	LINE COVERAGE	P95 DRAFT BUILD, MS	MODEL CALLS
0 format errors, 0 exceptions	suite runs in about 126 s	over 3404 statements	p50 31.0 ms; D07 3.7 s, D10 1.3 s	0.00 USD per pass

Measured at 8c3ac7f on 28 October 2026, against the 12 dev cases. Code at main 8553bb3.

NOT DONE, NAMED

A GAP IS NOT DELIVERED

4 NAMED GAPS

		TICKET
M1	reviewer identity	no ticket
M3	live model route, off by default	ADR-003
L1	updates and closes, blocked by Gate U	no ticket
L4	wrapped statement limit	RED_TEAM

None of these is delivered. All twelve dev cases pass.

0 PULL REQUESTS OPEN

#52	escalation and untrusted evidence, merged
#63	review gate for the endpoint, merged
#65	hybrid model path, ADR-003, merged
#66	meters delivered as COF-43, closed

Every change landed on main. The four gaps above are the work left.

NEXT 30 DAYS

01	**Add reviewer identity.** M1: the gate records who approved, not just that someone did.	2 WEEKS
02	**Approve the model route.** ADR-003 needs a volume run before anyone quotes latency or price.	1 WEEK
03	**Start the intake pilot.** Two analysts, real complaints, the same contract and the same gate.	30 DAYS
04	**Productize the next two complaint types.** Pick them from what the pilot sees most.	AFTER THE PILOT
05	**Turn on ruleset enforcement.** Blocked by the GitHub plan, so the checks are advisory today.	BLOCKED

THE ASK

1. Approve the model route for the two closed questions.
2. Name the next two complaint types to productize.
3. Two analysts for a 30 day intake pilot.
