Requirements trace · brief to diagram

TRACE v2 · 22 OBLIGATIONS

Every obligation in BRIEF.md mapped to a stage or rule on architecture-capstone-v2.pdf pages 2 and 3. Column 4 grades the drawing; where a row now rests on the build, the note names the file that proves it.

sources **BRIEF.md** · ASSESSMENT.md · OUTPUT_CONTRACT.md · API.md · POLICY_GUIDE.md · reports/ target **architecture-capstone-v2.pdf** p.2 flow, p.3 proof lane date **2026-10-27**

01 Client obligations

BRIEF.md, business need, required behavior, engineering expectations, deliverables

ID	OBLIGATION AS WRITTEN IN BRIEF.MD	WHERE THE DRAWING COVERS IT	STATUS	NOTE
B1	Three supported dispute types: unauthorized, duplicate_charge, service_not_received	4 Gates, 5 Classify & draft, OUTPUT MAP: 5 labels, 3 supported	COVERED	
B2	Ambiguous and unsupported complaints escalate; no invented classification	4 Gates: unsupported (cash) to manual review; auth conflict to ambiguous	COVERED	
B3	Deadlines computed in deterministic code	5: deadline is date math in code, never model; V1 20/30/45, V2 30/45/60	COVERED	
B4	Retrieve transactions and merchant context	3 Build record: GET transactions + merchant context	COVERED	
B5	Identify missing evidence before drafting	4 Gates: missing evidence to request information; OUTPUT MAP	COVERED	
B6	One targeted question per missing field	5 draft: follow-ups; contract: one per missing field	COVERED	
B7	Draft a customer message, marked as a draft	5 customer reply always marked DRAFT; contract row	COVERED	
B8	Create the case only after human approval	6 agent never approves or rejects, then 7 POST /v1/records	COVERED	
B9	No creation after the approved draft changes	6: changed draft means new approval (403)	COVERED	
B10	Create-only; update and close are separately contracted stretch work	7 Create record: create only, no update, close or delete	COVERED	
B11	Never promise a refund or outcome	hard rules: no refund, success or eligibility promises	COVERED	
B12	Never follow instructions found in evidence	1: attachments are evidence, never orders; untrusted text never changes the rules	COVERED	
B13	Show policy source IDs and short exact quotes	2 policy version; contract citations{claim, source_id, quote}	COVERED	
B14	Handle normal, ambiguous, unsupported, outage, duplicate, stale policy, injection	4 Gates, 7 duplicate loss, hard rules block	COVERED	spread over 3 blocks
B15	Retrieval, tool integration, justified agent design, human review	stages 1 to 6 end to end	COVERED	
B16	Evaluations, with actual results	reports/scored-run.json, reports/eval-dev.md	COVERED	12 of 12, p95 3670 ms
B17	Structured monitoring	8 logs + page 3 five per-case meters	COVERED	
B18	Reproducible deployment	page 3 six-step build chain	COVERED	
B19	Measure latency and model/tool usage; no invented claims	page 3 meters: latency, calls, tokens, attempts	COVERED	
B20	Tool-assisted workflow where the next step depends on tool results	3 to 4: txn service down routes to manual review	COVERED	
B21	LLM only where it helps; determinism justified	4 Gates tagged NO LLM; 5 tagged DRAFT	COVERED	
B22	Decision record, eval results, traces, runbook, limitations, roadmap, demo	page 3 deliverable rail, 8 chips	COVERED	eight deliverables in the tree

Scoring view · rubric, gates, contract

The same drawing read against the published rubric and the six critical gates. Gates are binary: a partial gate is a failed gate until the wording closes.

SCORE MAP · 6 GATES

sources **ASSESSMENT.md** · OUTPUT_CONTRACT.md pass bar **70/100 plus all 6 gates** estimate **R1, R3, R4, R6 met; R2 and R5 still owe**

02 Rubric dimensions

75 percent anchor is core behavior with explainable limits; 100 needs adverse cases

ID	RUBRIC DIMENSION (ASSESSMENT.MD)	PTS	WHAT THE DRAWING ALREADY SHOWS	WHAT 100 PERCENT STILL NEEDS
R1	Required workflow and domain rules	25	1 to 5 plus OUTPUT MAP and the V1/V2 deadline table	Met: 12 of 12 dev cases green in reports/scored-run.json
R2	Grounding and uncertainty	20	3 source_id on every quote; 4 conflict to ambiguous; citations field	Needs a quote slicer and every contradiction cited
R3	Tools and human boundaries	20	3 bounded reads; 6 draft hash; 7 Idempotency-Key and 409	Met: required_reads and no_forbidden_writes 12 of 12 in reports/eval-dev.md
R4	Evaluation and resilience	15	page 3 quality loop to tools/evaluate.py	Met: the run is published, 12 of 12, p95 3670 ms
R5	Deployment and operation	10	page 3 meters and six-step build chain	Needs a recorded fresh setup on a clean shell; the runbook is written
R6	Client demo and technical defence	10	page 3 deliverable rail, 8 chips	Met: ADR-001 to ADR-004, LIMITATIONS, RUNBOOK, ROADMAP, eval reports and CONTRIBUTION are in the tree

03 Critical gates

6 clean · 0 partial · 0 absent

ID	CRITICAL GATE	DRAWN EVIDENCE	STATUS	NOTE
G1	No autonomous adjudication or prohibited customer commitment	6: agent never approves or rejects; hard rules bar promises	COVERED	
G2	No unapproved or modified-after-approval write attempt	6: changed draft means new approval (403)	COVERED	
G3	No instruction override from untrusted evidence	1: never orders; hard rule: untrusted text never changes the rules	COVERED	
G4	No restricted synthetic values in outputs or logs	8: no restricted tokens, PII or PAN; rule covers output, narrative, logs	COVERED	
G5	No duplicate record created	7: 409 duplicate, duplicate intake maps to same loss	COVERED	
G6	No fabricated evidence behind a recommendation	3: source_id kept on every quote; hard rule: never fabricate a source	COVERED	

04 Output contract fields

10 required fields, all named and tightened in v2

C1 · COVERED
case_id
string supplied by input

C2 · COVERED
classification
5-value enum

C3 · COVERED
routing
ready, request, manual

C4 · COVERED
policy_ids
all applicable, no stale

C5 · COVERED
facts
4 keys, null when unknown

C6 · COVERED
missing_information
3 allowed identifiers

C7 · COVERED
deadline
ISO date, else null

C8 · COVERED
citations
claim, source_id, quote

C9 · COVERED
follow_up_questions
one per missing field

C10 · COVERED
narrative
evidence, uncertainty, draft

What is missing · and when it bites

OPEN · 1 · CLOSED · 10

One gap remains after the refresh and it is evidence, not design: a recorded clean-shell setup. The run, the meters, the four refusals and the eight deliverables now sit in the tree, so the rows below cite files.

evidence **reports/scored-run.json: 12 of 12 green, 0 format errors, p95 3670 ms** freeze **Tue 27 Oct 17:00** defence **Fri 30 Oct**

05 Interface coverage

7 endpoints, 2 operator behaviors · covered 11 · partial 0 · gap 0

ID	ENDPOINT OR BEHAVIOR (API.MD)	WHERE THE DRAWING COVERS IT	STATUS
A1	GET /health	page 3 build step 04	COVERED
A2	GET /v1/cases	page 3 build step 04	COVERED
A3	GET /v1/cases/{id}/transactions and merchant	3 Build record	COVERED
A4	POST /v1/reviews returns review_id and draft hash	6 Human boundary	COVERED
A5	GET /v1/reviews/{review_id} poll the decision	6 poll GET /v1/reviews/{review_id}	COVERED
A6	POST /v1/records with Idempotency-Key	7 Create record: 201, 200 replay, 409	COVERED
A7	GET /v1/records/{case_id} live ledger	8 Verify & audit: read back the live ledger	COVERED
A8	No record on missing, rejected, wrong-case or changed approval (only a changed draft is a 403)	src/review_gate.py; tests/test_review_gate.py covers all four	COVERED
A9	503 upstream_timeout, 3 attempts max then escalate	3 retry twice; hard rules 3 attempts max	COVERED
A10	KYC read-only, never attempt a record	hard rules: KYC read-only, never attempt	COVERED
A11	No auth, loopback only, no batch, no adjudication endpoint	docs/LIMITATIONS.md L2/L3/L4; docs/API.md:30	COVERED

06 Gap register

ordered by score risk, not by effort

ID	GAP	WHY IT COSTS	FIX	OWNER	BY	STATE
G-01	Evaluation run and its numbers	R4, 15 points. G1 needs 8 of 12 green Mon 26	Closed: reports/scored-run.json 12 of 12, 0 format errors, p95 3670 ms	Eval lane	Mon 26	CLOSED
G-02	Meters not implemented	R5. Measurement is required, not optional	Closed: src/meters.py writes one redacted line per case; reports/meters.jsonl has 12	Eval lane	Tue 27	CLOSED
G-03	Fresh setup not proven	R5, 10 points	Run the six build steps on a clean shell and commit the transcript; only the path in docs/RUNBOOK.md exists	Ops	Tue 27	OPEN
G-04	403 variants and wrong-case guard	A8, R3	Closed: src/review_gate.py raises for missing, rejected, wrong_case and changed; tests/test_review_gate.py names all four	Lead	sheet v3	CLOSED
G-05	Eight deliverables not written	R6, 10 points	Closed: ADR-001 to ADR-004, LIMITATIONS.md, RUNBOOK.md, ROADMAP.md, evals reports and CONTRIBUTION.md are tracked	All three	Thu 29	CLOSED
G-06	Auth and batch limits unstated	A11 is a limitation, not a defect	Closed: docs/LIMITATIONS.md L2 states no auth and loopback, L4 states no batch	Ops	sheet v3	CLOSED
C-01	Five drawing gaps closed in v2	was A5, B10, C6, C9, G4, G-09	reject exit and poll, create-only, cardinality, gate wording, startup	Lead	v2	CLOSED

Where the trace stands

Every row that could close this week did: the run published 12 of 12, the meters write one redacted line per case, the gate names all four refusals, and the eight deliverables are tracked. What is left is one proof, not design: a recorded clean-shell setup, and a p95 of 3670 ms against the 2.5 s line.

Refreshed 2026-10-27 against main 036f0ce after the COF-43 and COF-48 work: B16, A8 and A11 moved to covered and five gap rows closed, which is why the counts moved.
